EDUCATION

- **Kalinga Institute of Industrial Technology** Odisha, India
Bachelor of Technology - Computer Science; GPA: 7.23
October 2021 - August 2025
- **Mayo International School** New Delhi, India
HSC - PCM; 75%
April 2020 - March 2021

SKILLS SUMMARY

- **Languages:** Python, C++, JavaScript, SQL, Bash, JAVA, HTML, CSS
- **Frameworks:** React, TailwindCSS, Pandas, Sci-Kit Learn, TensorFlow, NodeJS, Springboot, FastAPI
- **Tools:** Github Copilot, Git, PostgreSQL, MySQL, Maven, Jenkins, JMeter, VS Code, Oracle Weblogic 12c, SwaggerUI, Postman, REST APIs

EXPERIENCE

- **Servosys Solutions** July 2026 - Present
SDE-1 Noida, Uttar Pradesh
 - Acted as the primary technical POC for Five-Star Business Finance, independently investigating and **resolving critical product issues** to ensure seamless business operations.
 - Bridged the gap between the client and internal engineering/QA teams, translating client **pain points into actionable technical requirements** and tracking them to successful deployment.
- **Servosys Solutions** Jan 2026 - July 2026
SWE (Intern) Noida, Uttar Pradesh
 - Built a dynamic **Theme Manager** enabling UI personalization through custom colors, fonts, and logo uploads. Implemented logo-based theme auto-suggestions to improve customization **efficiency**.
 - Contributed to improving **code quality, maintainability, readability, and security compliance** by performing code refactoring and optimization, resulting in a **30% reduction in code smells**.
 - Migrated **Servostreams 7.0** from **JDK 8 to JDK 17**, ensuring seamless **compatibility and modernization** of the application stack.
- **Servosys Solutions** July 2025 - Jan 2026
QA (Intern) Noida, Uttar Pradesh
 - Performed manual testing to validate functional and business requirements, conducted **VAPT assessments** to identify security vulnerabilities, and **optimized SQL queries and data validation processes** to enhance application **reliability, accuracy, performance, and security**.
 - Gained hands-on experience in developing a **Loan Origination System (LOS)**, worked with **process modeling and workflow automation** in Signavio, performed **database design** and queries using SQL Developer, and deployed applications on Oracle WebLogic 12c. Understanding the **end-to-end lifecycle of enterprise loan management systems**.
- **HighRadius Corporation** April 2025 - June 2025
Fin-Tech Advisor (Intern) Bhubaneswar, Odisha
 - Conducted market research and prospect analysis across the **US and EMEA regions** to identify qualified **enterprise finance leads**.
 - Executed multi-channel outbound outreach campaigns via **phone, email, and LinkedIn** to drive engagement for **Order-to-Cash (O2C), Treasury, and Record-to-Report (R2R)** automation solutions.
 - Collaborated with **Sales Development Managers** to optimize prospect targeting strategies and improve outreach conversion effectiveness.

PROJECTS

- **Breat Cancer Detection System:** Developed a machine learning model to classify breast tumors as malignant or benign using Logistic Regression Model and evaluated performance using accuracy, precision, recall, and F1-score. Tech: Python, Scikit-learn, Pandas, NumPy, Jupyter Notebook, Machine Learning, Logistic Regression
- **Push-Up & Pull-Up Counter:** Built a real-time Push-Up & Pull-Up Detection application using Python, OpenCV, and pose estimation techniques to track exercise repetitions and analyze body movement accuracy. Tech: Python, OpenCV, Computer Vision, Pose Estimation, NumPy, Video Processing, Jupyter Notebook.
- **MediChat- A Medical Chat Bot:** Developed a Medical Chatbot using Python, Flask, NLP, and Machine Learning to analyze user symptoms and provide automated healthcare-related responses through an interactive conversational interface. Tech: Python, NLP, Machine Learning, Flask, Scikit-learn, Pandas, NumPy, Jupyter Notebook, Symptom Analysis.
